Largest angle? why do we try to find the largest angle first? that way the other two angles must be acute (less than  $90^\circ$ ) and the law of sines will give correct answers.

Now we use the the law of sines to find the smaller of the other two angles. why the smaller angle? because the inverse sine function gives answers less than  $90^\circ$  even for angles greater than  $90^\circ$ . Precalculus notes and tests / exams (algebra notes and trig notes; algebra tests / exams and trig tests / exams) • printing suggestions for typed files. i recommend two-page-to-a-side and/or double-sided printing to save paper. Algebra 2 made completely easy! our algebra 2 tutors got you covered with our complete online help for algebra 2, whether it's for standard common core algebra 2, engageny (regents examination) or eoc algebra 2. learn algebra 2 with ease! These worksheets are perfect for students who are looking for extra practice or teachers who need extra problems for their students. in fact, we offer an entire algebra 2 curriculum: fourteen units covering all topics equations, to conic sections, and even trigeck it out! Purplemath. solving trig equations use both the reference angles and trigonometric identities that you've memorized, together with a lot of the algebra you've learned. be prepared to need to think in order to solve these equations.. in what follows, it is assumed that you have a good grasp of the trig-ratio values in the first quadrant, how the unit circle works, the relationship between Algebra cheat sheets - this is as many common algebra facts, properties, formulas, and functions that i could think of. there is also a page of common algebra errors included. there are two versions of the cheat sheet available. one is full sized and is currently four pages.

How to learn algebra. learning algebra can seem intimidating, but once you get the hang of it, it's not that hard! you just have to follow the order for completing parts of the equation and keep your work organized to avoid mistakes! In algebra, we'll need to know these and many other basic rules on how to handle exponents and roots when we work with them. here are the rules/properties with explanations and examples. Click on submit (the arrow to the right of the problem) to solve this problem. you can also type in more problems, or click on the 3 dots in the upper right hand corner to drill down for example problems.
