

Conventional Power Engineering Tech Max

Chapter 1 : Conventional Power Engineering Tech Max

The machine was set up as follows: the frequency was 72.5 hz, the amplitude was 0.7 mm, the applied pressure was 0.123 mpa, and the main vibration time was 7 seconds. The unique image control waveguide completes the acoustic design. a marvel of engineering in its own right, this new jbl waveguide was designed specifically for the m2.
